Contents

• Data Analysis
• Data Analysis Case Study: Effect of Neurotoxin Pesticides
• Doing Science
• Microscopes
• Cells and Cell Structure
• Cell Fractionation
• Membrane Properties
• Osmosis
• Enzyme Activity
• Aerobic Cell Respiration and Fermentation
• Yeast Respiration Rate
• The Effect of Temperature on Animal Respiration Rate
• Leaf Pigments Absorption Spectra
• Leaf Structure and Function
• Photosynthesis
• Light-Dependent Reactions of Photosynthesis
• Mitosis and the Cell Cycle
• Meiosis and Life Cycle Patterns
• Mendelian Inheritance in Corn
• Cat Coat Genetics
• Human Inheritance Patterns
• Polytene Chromosomes
• Detecting Cancer Genes
• Human β-globin (Hemoglobin) Activity
• Transformation of E coli
• Plasmid Mapping

Helpful Materials

• Writing a Lab Report
• Using the Data Recorders
• Using the Spectrophotometer
